# SEEKING LAWN SUPREMACY?

**TifGrand reigns over most  
other landscape grasses.**

Exceptionally fine bladed and dense, TifGrand Certified Bermuda provides a barefoot-soft yet resilient surface that provides unsurpassed wear tolerance in lawns that attract a lot of play and foot traffic. It also requires less fertilizer to maintain its natural deep-green color, and its extensive root system and rhizomes give it excellent drought resistance and cold tolerance.

Even more impressive, TifGrand is the world's first and only sterile triploid bermudagrass engineered to perform in moderate shade. Nine years of university testing proved that TifGrand thrives in both full sun and moderate shade, a unique attribute among bermudagrasses. So now, lawns and landscapes that spotlight a few specimen trees can also feature consistent coverage of high-quality turfgrass.

All these superior qualities and genetics have made TifGrand a favorite among a number of demanding landscape professionals. Available throughout the Carolinas and Virginia from Buy Sod, certified TifGrand bermudagrass has set a new standard for premium bermudagrass.

**TIF GRAND<sup>®</sup>**  
CERTIFIED BERMUDA

# TifGrand Bermudagrass

## Attributes and Benefits

- ✓ Superior performance in sun and moderate shade = versatility.
- ✓ Extremely dense and fine bladed = outstanding wear tolerance.
- ✓ Natural deep-green color = visually striking with less inputs.
- ✓ Can be mowed at 0.25" to 2.0" = appropriate for multiple site uses.
- ✓ Deep, extensive root system = exceptional drought resistance.
- ✓ Excellent non-preference to tawny mole cricket = fewer pesticides.
- Extensively tested — 23 tests in 19 states in independent NTEP trials, 9 years of trials for insect resistance and shade tolerance and 7 years of practical application (golf and landscape) evaluation.
- ✓ Warm-season variety suited for Hardiness Zones 7A, 7B, 8A and 8B.

## Best Management Practices

**Sunlight Requirement:** Grows well in full sun or moderate shade. Best performance with at least 6 hours of sun per day.

**Mowing:** Best maintained at 0.25" to 0.75" (reel mower) or 1.0" to 2.0" mowing height (rotary mower).

**Fertility:** Recommended 2 to 3 lbs. N/1,000 ft<sup>2</sup>/year.

**Weed Control:** All herbicides labeled for use on bermudagrass can be safely applied to Buy Sod's TifGrand bermudagrass. Always follow label instructions.

**Insect Control:** Exhibited excellent non-preference to tawny mole crickets. Always follow label instructions with insecticides.

For details on installation and maintenance, visit [www.buysod.com](http://www.buysod.com).

## Best Uses

**Landscape** — commercial and residential applications with sun or moderate shade.

**Golf** — fairways, tees and short-cut chipping areas.

**Sports** — higher-end athletic fields where professional quality is desired.

## Pedigree

TifGrand was developed by USDA-ARS in cooperation with the University of Georgia at the Coastal Plain Experiment Station in Tifton, GA. It was released to licensed growers in 2010.

## Buy Sod's Quality Assurance — State Certified Sod

Choosing certified sod is the only way you can be certain that the variety you receive is exactly what you purchased. Buy Sod produces only "Blue Tag" certified TifGrand bermudagrass sod in accordance with state certification standards and protocols, ensuring genetic purity and uniformity, and a certification tag accompanies every order.
